## Sending Emails - Manage Mails tab

Below are the steps that you should take when sending and generally managing email part of Traffic Xtreme

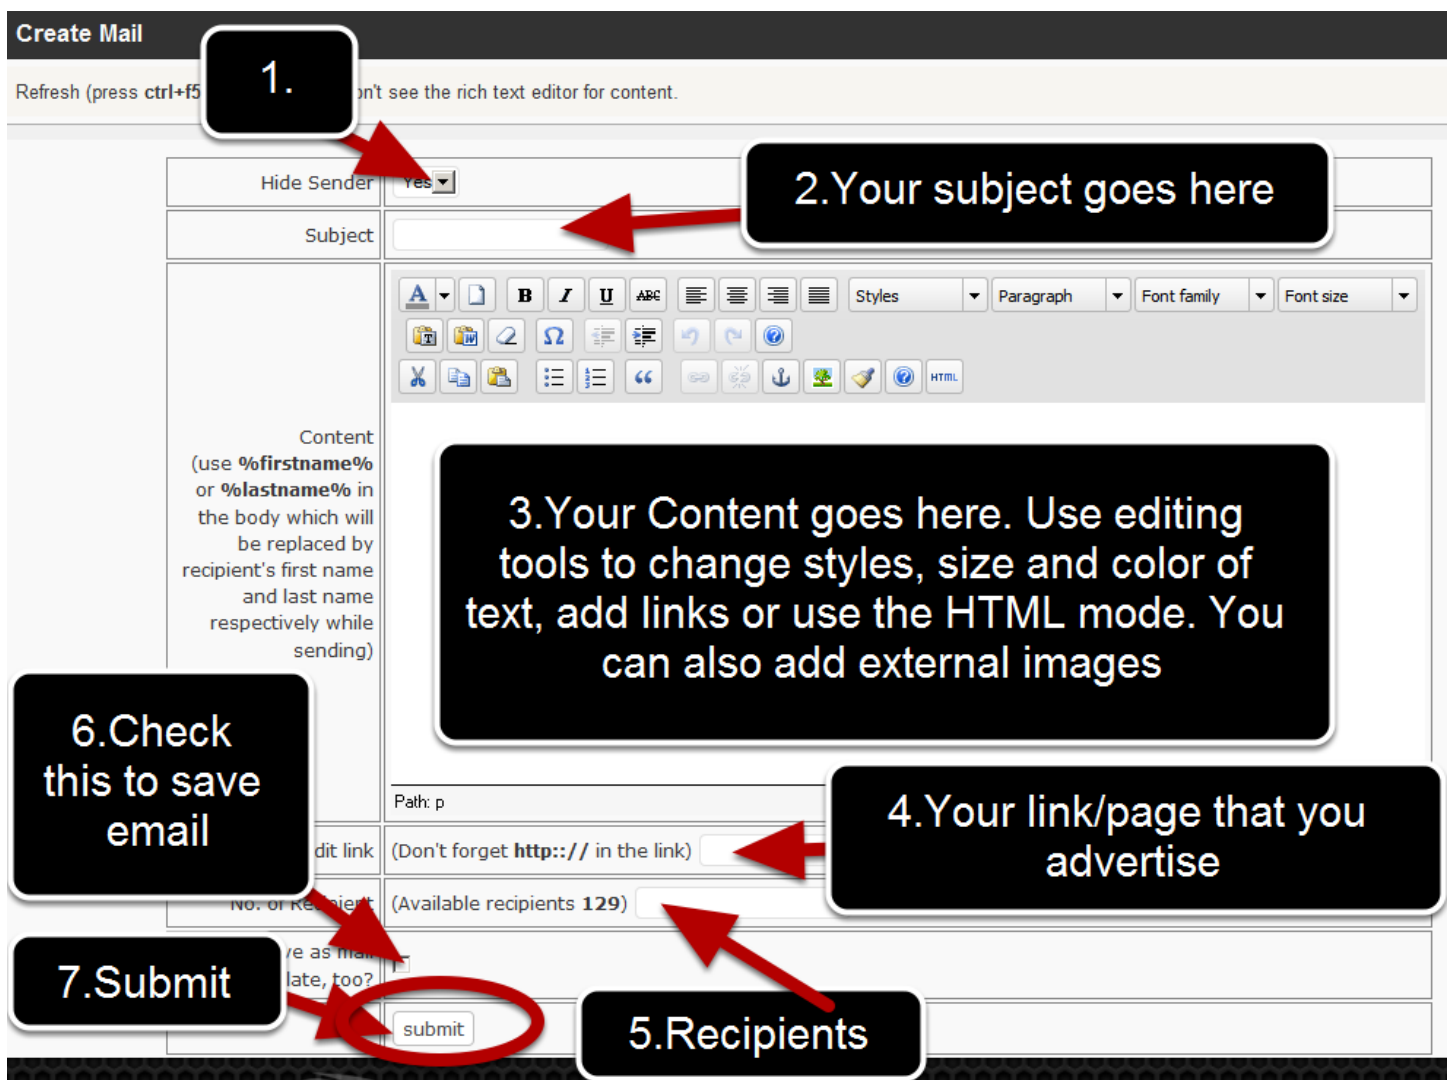

### Manage Emails

Select Manage Mails if you want to compose/send a new email

Select Saved Mails if you want to review and use previous emails. \* Note that the number of saved emails varies depending on your membership level

### Create/Send Email

A screenshot of the 'Create Mail' form with seven numbered callouts. Callout 1 points to the 'Hide Sender' dropdown. Callout 2 points to the 'Subject' field. Callout 3 points to the rich text editor. Callout 4 points to the 'Add link' field. Callout 5 points to the 'No. of Recipients' field. Callout 6 points to the 'Save' button. Callout 7 points to the 'submit' button. The form includes a 'Refresh' button, a 'Content' area with a rich text editor, and a 'submit' button at the bottom.

1. Choose if you want to display your real email to all recipients or hide it and use the one we provide-noreply@www.TrafficXtreme.com

1. Add the subject of your email - avoid words like "make money" "free" "you won" "admin email" "Support" "You got a payments" and so on - most likely your email will go to spam and if you insist on doing this we will disable your account
2. Content area- use the editing buttons to change your email as you wish. All emails are HTML; if you want you can paste a pre-formatted HTML message. You can also add images but they have to be hosted somewhere else on the net - note the link before composing the email
3. This is your credit link - people will see this page once they click on the link to earn credits
4. The number of recipients/members that you are allowed to submit to-this depends on your membership level. Until you reach the membership cap you can send to all members. For each member 1 credit is deducted from your account
5. Save email. If you wish to use the email again you can save it in your account. The saved emails are accessible by clicking on **Saved Mails** link in **Manage Mails** tab. The number of emails you can save also depends on your membership level/type
6. Click on Submit to send your email. The email is added to the queue and will be delivered as soon as possible, depending on the server load in that particular moment. For now, the server send at each minute so if there is no other email in queue yours will be sent almost immediately.

## Placement and type selection

After you have selected text in the first menu you should select the appropriate type from the menu. Make sure you select the **text ad**, not the **banner** when creating a text ad.

## Method

This can be a little confusing for some, but is nothing to be scared of. There are 2 ways to display your ads - either pay for each click, no matter how many times is displayed until clicked,(CPC) - this is more expensive ; or the traditional way - per impression. Each variant has a minimum that will be displayed for you once you choose. If you bid a higher amount your banner/text ad will be displayed more often.

You can use any of the banners by copy/pasting the HTML code where appropriate. If you can't add HTML code directly you can add the image link - look for something like "http://www.TrafficXtreme.com/wp-content/plugins/wp-list-mailer/referrerImages/125x125.jpg" and use your referral link as a target URL.

**\*Note - All banners already contain your affiliate link/code. Do NOT modify them unless you know what you are doing as you can break the code and ruin your promotion campaigns**

## Adding Your PayPal email

The image shows a user account interface with a sidebar on the left and a main content area on the right. The sidebar contains several menu items: 'Posts' (with a sub-menu for 'Posts' and 'Add New'), 'Comments', 'Profile' (with a sub-menu for 'Your Profile'), 'Manage Mails' (with sub-items 'Manage Mails' and 'Saved Mails'), and 'Account' (with sub-items 'Account' and 'Payment History'). Below this, there is a section for 'Paypal Email:' with an empty text input field and an 'Update' button. A red arrow points to the input field.

**\*Very Important - Do NOT forget to set your PayPal email in your Account page - we use this information to pay members their affiliate commissions**
